Urinary System Concept Map Answer Key by Prime Books

**Urinary System Concept Map Answer**
Ingestion is taking food into the mouth for example. Digestion is when the ingested food is now broken down into smaller building blocks. This may be achieved by mechanical means (chewing, churning) and chemical means (digestive enzymes of stomach and intestines). Absorption is when the digested building blocks are now absorbed into the bloodstream or lymphatic system through the intestines ...

What is the difference between ingestion, digestion ...
Unit 4: Skeletal System 1. Identify and describe the functions of the skeletal system. 2. Distinguish between long bones, short bones, flat bones, and irregular bones and provide an example of each.

The clitoris contains external and internal components. It consists of the glans, the body (which is composed of two erectile structures known as the corpora cavernosa), and two crura ("legs"). It has a hood formed by the labia minora (inner lips). It also has vestibular or clitoral bulbs. The frenulum of clitoris is a frenulum on the under-surface of the glans and is created by the two medial ...

Neuroprosthetics (also called neural prosthetics) is a discipline related to neuroscience and biomedical engineering concerned with developing neural prostheses. They are sometimes contrasted with a brain-computer interface, which connects the brain to a computer rather than a device meant to replace missing biological functionality. Neural prostheses are a series of devices that can ...
